

Andrew H. Rissler

404-457-7578 | arissler3@gatech.edu | U.S. Citizen

OBJECTIVE

Passionate, capable, third-year Computer Engineer with prior engineering experience at Gulfstream Aerospace.

EDUCATION

Georgia Institute of Technology | Atlanta, GA *B.S. in Computer Engineering* | GPA: 3.94 (127 credits applied, Graduating Fall 2027)

SKILLS

Programming: Java, Python, C#, C/C++, JavaScript, HTML, CSS, ARM Assembly, VHDL, Verilog

Hardware: Microcontrollers, SPI/I2C/UART/CAN Devices, ADCs, FPGAs, Analog/Digital Sensors

Software: Visual Studio Code, Arduino, Quartus, Altium, Keil Vision, ModelSim, Catia, Smarteam

EXPERIENCE

Gulfstream Aerospace | Savannah, GA *Collegiate Co-op* | [January 2025 – April 2026]

Developed a critical comparison tool for managing lab states to ensure testing was done properly

Critical adhesive went end of life, managed cross-disciplinary team to create an FAA certification plan for a replacement product

Adjacent team had a time intensive, manual method of data entry for project timeline tracking. Developed a VBA based script to automate said process to free up managers schedule

Struggled with acronym definitions, built a translation chatbot powered off an adaptable .csv database leading to successful distribution, deployment, and use among other co-ops

Earned yellow belt Lean Six Sigma certification and was trained in 3D-printing.

GT Off Road | Atlanta, GA *DAQ Lead* | September 2023 – January 2026

Took over Data Acquisition System with improper documentation capable of ~100sps, lead charge to rebuild to achieve ~200ksps polling rate and record 256x more accurate analog readings

Recruited a self-sustainable team capable of refining the PCB design and code I initially developed

Integrated CUDA compute capabilities into in-house data analysis tools to reduce data processing time

Diagnosed issue with SPI based sensor communication protocol and implemented an ARMv7 assembly based task scheduler to allow system to seamlessly accommodate it

Gained extensive experience with vibration, water, and dust isolation for microelectronics

PROJECTS

Personal Website, 1999 NB Miata Project Car, 1997 Ford Ranger Project Car, Home Lab, PlayniteOS, PlayniteNASync
